Attitudinal Survey:

Goals of the lab.
1. It will not affect their grades
2. Encouragement to complete it
3. It helps to improve the course for the future.

Background:
This is an attitudinal instrument that the students should be encouraged to complete. They should think of it as a separate lab that they submit. Explain to the students that this will not affect their grade. Show the students where the survey is; it should be a link from the initial page.

Relevant Formula:
